SUMMARY

Front-End Web Developer with 2 years of experience in a software company developing banking applications and 2 years of freelance work. Proficient in JavaScript, Vue.js, React.js, and TypeScript, with a focus on creating secure, user-friendly, and high-performance web interfaces. Consistently delivers quality solutions in both corporate and freelance projects.

EXPERIENCE

Software Design Engineer

Teresol Private Limited

10/2022 - Present Islamabad

- Working as a Vue.js developer on a core banking project for Bank Al-Habib Limited.
- Remapping the old front end (Java Code) to Vue.js.
- Optimized front end architecture, resulting in a decrease in server requests and improvement in page rendering speed, leads to cost savings and improved customer satisfaction.
- Developed features for Banking Modules like Teller, CRM, Remittance, Term Deposit.

PROJECTS

Mobile Bandencentrale

- Developed **React.js** web app that uses Google Maps, Email and WhatsApp Services to order tyres and vehicle related services in Belgium.

World Countries

- Developed a **React.js** web app that utilizes third-party APIs to fetch countries' data.
- Developed site provides countries with all information including states, cities, population, area, etc.

Git Factory

- Developed web app using **React.js** that has a Git commands list in one place.
- Developed features allowing users to copy and download Git commands.
